## Saffron or red gold of Iran

Iranian saffron is one of the best and high quality saffron all over the world. Khorasan province is the main producer in Iran. This fragrant spice with its pleasant aroma is so famous among the people around the world because of its unique properties on health and it causes to have medical and edible usages.

Saffron is supplied to the clients in kinds of export Negin, Sargol and etc. Also we are able to pack it based on clients' order or favorite in various and beautiful packages.

# Cumin

Cumin is a fragrant spice that has unique edible and medical properties. Cumin plays important role on our health and prevents cancer (the illness of century) because it is rich in fiber and active antioxidants. Because of powerful benefits on health, in addition to be used as spice in food, it is used to produce different medicines in modern and traditional medicine. We supply cumin organically or non-organically based on client's need.

## Date

Date has high nutritional value and calorie and high amount of vitamins and nutrition. Also it contains natural sugar such as fructose, glucose and terebinthina that reinforce the energy. Date is elixir of youth and energy recovery. We can insure our health and also cover the energy and nutrition of the body by using it daily and regularly. In Iran there are different kinds of date like Mazafati, kabkab, piaram, zahedi and etc which are harvested from palm-groves of south part of Iran. Because of the climate of region, the taste and quality is very good.

Date

# Raisin

Raisin is full of vitamins and nutrition.

It is categorized by the difference in methods in production such as Aftabi (dried under the sun shine), Tizabi (dried by adding a liquid named tizab), saye-khoshk (dries under the shade) currant and etc. there are lots of vineyards in many cities in Iran like Kashmar, Qazvin, Mallayer...

For producing raisin from grapes there are several methods. Green slender raisin of kashmar and Sultani raisin from mallayer are two of the most famous raisins in Iran that they are well-known around the world.

# Barberry

Barberry is one of local shrubs in Iran. Iranian barberry in its kind is unique. Iran is the main producer of seedless barberry (poloee) in the world. 95% of barberry around the world is from Iran and 97% of Iran's production is from Qaenat where is in south Khorasan province (its saffron is also very famous). Producing barberry in Iran is completely natural and organic. None chemical fertilizer or agricultural poison is used so the Europeans are fond of Iranian organic barberry.
